Profile Summary

Computer Science and Engineering undergraduate with hands-on exposure to Java, Python fundamentals, HTML, and web application development. Completed internships with SmartBridge and Brain O Vision, gaining practical experience in software development, databases, data processing, and AI/ML concepts. Interested in software development, emerging technologies, problem solving, and building practical solutions.

Education

Annamacharya Institute of Technology and Sciences, Tirupati 2023–2027
Bachelor of Technology in Computer Science and Engineering **CGPA: 7.52/10**
Rayalaseema Junior College 2021–2023
Intermediate Education **Score: 8.3/10**
Z.P. Babu Agraharam Passed Out: 2021
Secondary School Education **Score: 9.7/10**

Internships

SmartBridge – Virtual Internship
- Completed a technical internship focused on software development, databases, and emerging technologies.
- Gained practical experience with development tools, application development fundamentals, and problem solving.

Brain O Vision – Python Full Stack / AI Internship
- Completed an internship focused on Python programming, data science, machine learning, and web application development.
- Developed an **AI-Based Email Classification System** using Python, NLP, and machine learning concepts.

Projects

AI-Based Email Classification System
- Developed a web-based application to analyze and classify email messages using machine learning and natural language processing techniques.
- Implemented email preprocessing and classification to identify spam and important emails.

Support Ticket System *HTML, JavaScript, MongoDB*
- Developed a ticket management system that enables users to raise support requests and support staff to manage, update, and resolve tickets.
- Implemented role-based workflows with ticket status tracking for efficient support management.

Darshanease – Temple Booking System *Web Application*
- Developed a temple booking platform that allows devotees to view temple services, select available dates and time slots, and make bookings online.
- Designed a user-friendly booking workflow to simplify temple visit planning and appointment management.

Certifications

- SmartBridge – Virtual Internship Certification
- Brain O Vision – Internship Certification
- Workshop on Generative AI with Hackathon=

Technical Skills

Programming Languages: C,Java, Python (Basics)
Web Technologies: HTML,CSS

Strengths

Strong communication and teamwork skills; quick learner with an interest in emerging technologies; problem-solving mindset and ability to adapt to new technologies.

Hobbies

Listening to music, reading books for knowledge and personal growth, and exploring new technologies.
